

Checklist/Routine

1. Send Check-in/out emails:

Use this subject line format: **Check in for MM/DD/YYYY**

ChiaKai Pan

10:50 AM

Check in for 11/18/2021

To: Aung Khant Nyar

Hi Aung,

Today I'm going to continue the Next Steps with React Section. The lecture I'm going to start is Step 09 – Defining Multiple Counter Buttons and Adding Components props. Thank you.

Best Regards,
Pan,ChiaKai

Yesterday

Check out for 11/17/2021

To: Aung Khant Nyar

Hi Aung,

Today I've completed 2 sections and 8 lectures of other section of the new course. The sections I've finished are Introduction, Getting Start with React-Basics with Components. The section currently working on is Next Steps with React – Building Counter Application. Thank you.

Best Regards,
Pan,ChiaKai

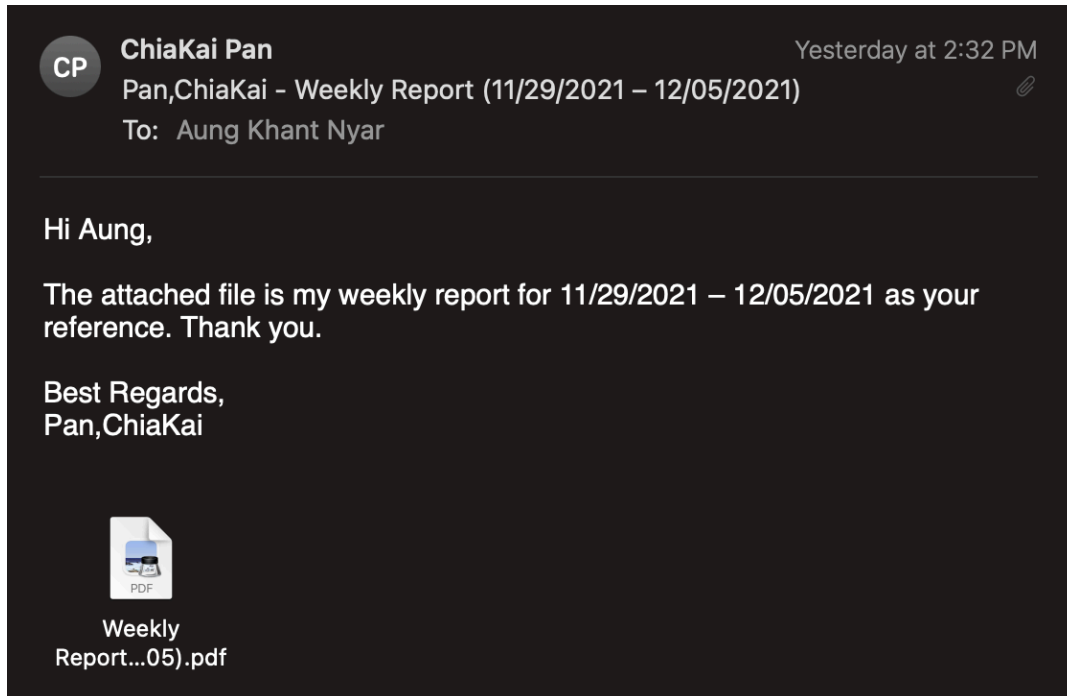

2. Fill out the timesheet (summary of each day):
 - a. **Color-code** every other week

Date	Time In	Time Out	Volunteer Hours	Agenda for the day	What has been completed	What needs to be carried on to the next day
09/15	9:19 AM	6:10 PM	7:26	Brainstorm plans for start on the Product Sales Finish 3 modules from the Data Analytics Course	I finished 3 modules that prioritized Data Repositories and Data Wrangling https://drive.google.com/file/d/15aAXn9YTw8527z6FPRqpbQaQuPo6n/view?usp=sharing Identified all the important tables that will be needed in a relational database https://drive.google.com/file/d/1Z2n8arBUN52auv7CQnqTbUKd0d0MJU7/view?usp=sharing Defined the problem statement and project objectives to get started https://docs.google.com/document/d/14sYXyq8BmhsSS31U3QdYon_wJFVarjdr7uag-drive_link&ouid=110666148890350195032&tpw=true&ad=true Narrowed down the software, Sheets Query, to use for data cleaning and data analysis	Start a new class in Data Analytics with Excel to start data cleaning Understand the variables and their relationship with each other Familiarize with Google Sheets Query or Microsoft Excel Query
09/16	10:15 AM	6:47 PM	6:53	Start online course on Analyzing Data with Excel Finish at least 3 modules for the course Familiarize myself with Data Cleaning	Today, I finished 3 modules for Analyzing Data with Excel course Imported both csv and xlsx files to check comfort working with Excel and MySQL Initial data cleaning will take place in Microsoft Excel thus I started filtering data to check data Made plans to get started with SQL and setup a connection that runs the program smoothly	Continue with Analyzing Data with course Implementation of Data Cleaning and remove unnecessary variables Write a Weekly Report
09/17	3:53 PM	8:35 PM	4:43	Finish at least 2 modules for the course Continue Data Cleaning in the sheets	Today, I finished 2 modules for Analyzing Data with Excel (Primarily focused on Data Cleaning) Due to losing access to Excel, I have to change my strategy to use MySQL for data analysis I researched the best approach to creating databases with the information that is in google sheets Started a course to relearn about SQL, to start creating the multiple tables in Codecademy	Install MySQL Workbench and open server in my computer Research a way to create database that copies all the Excel data Learn SQL course
Total				19:02		
09/18	3:48 PM	5:06 PM	1:18	Write a Week 1 Report	I wrote up the weekly report for the previous week I made plans/objectives for the rest of the week	Install MySQL Workbench and open server in my computer Research a way to create database that copies all the Excel data Learn SQL course
09/20	11:02 AM	6:27 PM	4:31	Install SQLWorkbench and connect to server in Mac Learn SQL Course (Finish 1 module at least)	Installed the MySQL Workbench alongside the SQL Community server that gives access for free Started research on ways to transfer the Google sheets data to the MySQL I finished the introduction module that taught me the first codes necessary to create, insert, update and delete the tables that is important for my project I created two tables named order and products, and started manipulating with data by adding multiple columns to start transferring the data https://docs.google.com/document/d/1Qe1Rq78oZN1Hq1RqZAKosWG2930NTSnmmyWb0k0k/edit?usp=sharing	Continue with Module 2 and 3 of SQL Course Find a way to transfer all the google sheets data to the database
09/21	11:55 AM	5:40 PM	5:13	Finish 1 module of LearnSQL course Transfer all google sheets data to the workbench	Finished the module named "Queries", learnt the where, as, order by, limit, and case operations Used condition to change the format of the document from UTF-8 csv file to ASCII usable for SQL I imported the returns table from google sheets to the MySQL workbench without any errors Started the data cleaning process by counting the number and checking for duplicates within table	Make an ER Diagram for the Database Create multiple tables to import data separately Finish the LearnSQL course (2 modules left)
09/22	11:08 AM	4:54 PM	4:46	Research into ER Diagram and make one for database Create multiple tables to import the google sheets data	Watched ER Diagram Tutorial Part 1: https://www.youtube.com/watch?v=Qo8BYk7K9k Watched ER Diagram Tutorial Part 2: https://www.youtube.com/watch?v=CuY5ADwv24 I created a basic ER Diagram that incorporates most of the variables with the tables of orders, shipping, product, consumer, and returns However, the consumer variables doesn't have any PK values so, I need to figure out the key	https://www.youtube.com/watch?v=flagkHqlo Watch the above course, and finalize the ER Diagram Finish the LearnSQL Course (2 modules left) Create multiple tables to import the google sheets data
09/24	6:00 PM	11:19 PM	5:19	Watch the ER Diagram lec and finalize the ER Diagram Design an additional table for the ER Diagram	I watched the Database Lesson #4 to learn about the foundations of Data Modeling and ER Model I created a couple of connections with new tables to see if the variable works around Made a plan with completing most of the database lectures in the upcoming week	Continue watching the Database Lessons Lecture Finish the LearnSQL Course (2 modules left) Import google sheets data
Total				21:07		
09/26	9:08 AM	8:34 PM	6:40	Write up Weekly Report 2 Watch the ER Diagram Lec #4 (Recap/Highlights)	I finished working on the Weekly Report 2 and submitted it I imported couple more tables relating to shipping and products to my database Recapped the content of ER Diagram Lec #4 to include in my own ER Model	Watch Database Lesson Lec #5 Build the ER Model and finalize

3. Use the time tracker web app and write a few sentences:
<https://time-tracker-rnd4impact.herokuapp.com/>

shosamane.volunteer@rnd4impact.com stopped the timer at March 18, 2021 1:51 AM.	⏏
shosamane.volunteer@rnd4impact.com changed his current task to Fixing an issue where the hover title for the timestamp displays "Added on" for both rated cards and those in the watchlist at March 18, 2021 1:23 AM.	✓
shosamane.volunteer@rnd4impact.com started the timer on March 17, 2021 10:42 PM. Task: Handling an issue where users can rate movies that have not released yet	▶
shosamane.volunteer@rnd4impact.com stopped the timer at March 17, 2021 4:25 AM.	⏏
shosamane.volunteer@rnd4impact.com changed his current task to Handling cases where the movie page's "NoData" component remains hidden when it should not at March 17, 2021 2:00 AM.	✓
shosamane.volunteer@rnd4impact.com started the timer on March 16, 2021 11:28 PM. Task: Fixing an issue where the layout can get affected in mobile view if the "auto-rotate" option is selected	▶
shosamane.volunteer@rnd4impact.com stopped the timer at March 15, 2021 10:48 PM.	⏏
shosamane.volunteer@rnd4impact.com started the timer on March 15, 2021 8:02 PM. Task: Preparing the final list of tasks to work on for next week	▶

4. Weekly Report (summary of the last **21** hours, treat it like a journal):
 - a. **Naming convention:** Weekly Report 1,2,.. (MM/DD/YYYY - MM/DD/YYYY)
 - b. What I have done for the week
 - c. Challenges and lessons learned
 - d. What I'll be doing the following week (briefly)
 - e. Export it to **PDF** format

5. Zoom meetings (Aung will send me an email to schedule the appointment)
